SUMMARY

PROFESSIONAL SUMMARY

Recent B.Tech graduate in Computer Science and Engineering with hands-on experience in Manual Software Testing through an internship at Cravita Technologies, Pune. Skilled in test case design and execution, test scenario analysis, defect identification and reporting, bug verification, retesting, and test documentation. Familiar with SDLC, STLC, Functional, Smoke, Sanity, Regression, and Integration Testing, Agile methodology, and defect life cycle. Basic knowledge of Core Java, SQL, Selenium WebDriver, and Git. Eager to contribute to software quality assurance, usability evaluation, and continuous product improvement as a Software Testing Intern.

SKILLS

Manual Testing: SDLC, STLC, Test Cases, Test Scenarios, Functional Testing, Smoke Testing, Sanity Testing, Regression Testing, Retesting, Integration Testing, System Testing, UAT, RTM, Defect Life Cycle, API Testing

Defect Management: Bug Reporting, Defect Life Cycle, Defect Tracking, Root Cause Analysis (basic knowledge, if applicable), Requirement Traceability Matrix (RTM)

Usability Testing: User Interface Testing, User Experience Testing, Usability Testing.

Automation Testing: Selenium WebDriver, TestNG, Cucumber, JUnit, Page Object Model (POM), Selenium Locators, WebDriverWait, Actions Class, Cross-Browser Testing

Programming: Core Java, SQL, HTML, CSS, JavaScript (Basics)

Tools: Jira, Postman, Git, GitHub, Eclipse, VS Code

Methodologies: Agile, Scrum, Waterfall

PROJECTS

Manual Testing Project – Inflow Inventory Management System

Project Description: Worked on the Sales Order module of the Inflow Inventory Management System as part of a four-member QA team. Received test scenarios from the Team Leader, analyzed the business requirements, designed and reviewed test cases, executed test cases, identified defects, and prepared bug reports using Microsoft Excel. Collaborated with the team to verify bug fixes and ensure the quality of the application.

Key Responsibilities:

• Analyzed test scenarios and business requirements.

• Designed and executed test cases using Microsoft Excel.

• Collaborated with the QA and development teamsto ensure software quality.

Tools & Technologies: Manual Testing, Microsoft Excel, Agile Scrum.

Automation Testing Project: Practice Test Automation Website

Automated positive and negative login scenarios using Selenium WebDriver. Validated successful login messages and error messages with TestNG assertions. Managed web element locators using XPath and ID. Organized the project with Maven and the Page Object Model. Improved test reliability with reusable methods and clean framework structure.

EXPERIENCE

Software Testing Intern Cravita Technologies,
Pune March 2026 – Present

EDUCATION

B.Tech. – Computer Science and Engineering

Padmabhooshan Vasantraodada Patil Institute of Technology (PVPIT), Budhagaon,
Sangli. Year of Passing: 2026 | CGPA: 7.0/10
